

connecting links being spaced between said primary links and together with said primary links forming a bracelet, said primary links and/or said connecting links being provided with [, and at least one] visual reminder means for reminding the wearer of an event(s) comprising a selectively viewable mechanism associated with each of said primary and/or connecting links to indicate to the wearer which hours of the day [of the primary links] corresponds to an event(s) to be remembered.

2. (Canceled)

3. (Canceled)

4. (Canceled)

5. (Currently Amended)

An article of jewelry as claimed in claim 1 wherein said hour of the day indicating means is selected from the group [comprising] consisting of Roman numerals; [,] Arabic numbers; [,] an analog clock face; braille markings; and a column of stones.

6. (Currently Amended)

An article of jewelry as claimed in claim [4] 1 wherein said [visual] hour of the day indicating means [for providing a second visual indication of the hour of the day associated with said remainder means] comprises a second indicating means for

indicating one of the sequential hours of the day associated with each of said connecting links, said second indicating means being [is] selected from the group [comprising] consisting of Roman numerals; [,] Arabic numbers; [,] an analog clock face; braille markings; and a column of stones.

7. (Currently Amended)

An article of jewelry as claimed in claim [4] 1 wherein said set of primary links are provided with Roman numerals and said set of connecting links are provided with an analog watch face and a hour of the day marking stone.

8. (Currently Amended)

An article of jewelry as claimed in claim 1 wherein said visual reminder means comprises a knob associated with each of said primary links, said knobs comprising at least two viewable and different faces, rotatable with respect to said primary link to which it is associated and selectively displaying one of said viewable and different faces.

9. (Original)

An article of jewelry as claimed in claim 8 wherein said knob comprises four faces, each face having a colored stone thereon.

10. (Currently Amended)

An article of jewelry as claimed in claim 1 wherein said primary links are analog representations of a watch face and said hour of the day indicating means comprising [with] a stone marker for the hour of the day and said visual reminder means comprises, for each primary link, [is] a rotatable knob with at least two viewable and different faces rotatable with respect to said primary link and displaying one of said viewable faces.

11. (Currently Amended)

11, An article of jewelry comprising a set of primary links formed into a bracelet, each primary link having a visual indication of an hour of the day for an event to be remembered; and a selectively activated reminder [means] mechanism associated with each of said primary links[,], comprising a rotatable knob mechanically connected to each of said primary links, said knob having at least two visually distinct faces for selective manipulation of a face thereof into a viewable position.

12. (Currently Amended)

An article of jewelry as claimed in claim 11 wherein each of said knobs has four faces, each of which is provided with a colored gem.

13. (Currently Amended)

An article of jewelry as claimed in claim 11 wherein, for each of said primary links, a pair of said knobs are provided, said pair being located on the end of a rotatable axle passing through said primary links, [said axles having a knob on each end thereof, and] said knobs having different visual indicators from one another.

14. (Currently Amended)

AN
1
An article of jewelry as claimed in claim 11 further comprising connecting links interconnected between said primary links to form [a] said bracelet.

15. (Currently Amended)

An article of jewelry as claimed in claim 14, wherein said connecting links are provided with a separate visual indicating means [indicative] for indicating the hour of the day of [one] each of said primary links to which said connecting link is secured.

16. (Currently Amended)

An article of jewelry as claimed in claim 11 wherein said visual indication of an hour of the day for an event to be remembered is selected from the group [comprising] consisting of Roman numerals; [,] Arabic numbers; [,] analog clock face; braille marking; and a column of stones.

17. (Currently Amended)

An article of jewelry as claimed in claim 15 wherein said separate visual indicating means of said connecting links [and indicative of] for indicating the hour of the day for an event to be remembered is selected from the group [comprising] consisting of Roman numerals; [,] Arabic numbers; [,] analog clock face; braille markings; and a column of stones.

18. (Currently Amended)

An article of jewelry as claimed in claim 1 further comprising a biasing mechanism comprising an axle of square cross-section and a resilient spring bearing against a flat surface of said axle for ensuring that said visual reminder means is maintained in place until manually moved into a new orientation.

19. (Currently Amended)

An article of jewelry as claimed in claim 11 further comprising a mechanical biasing mechanism for ensuring that said reminder [means] mechanism is maintained in place [until] unless manually moved into a new orientation.

20. (Currently Amended)

An article of jewelry as claimed in claim [18] 19 wherein said biasing mechanism is a resilient spring which mechanically cooperates with said remainder means.

21. (Currently Amended)

An article of jewelry as claimed in claim [20] 19 wherein said visual reminder [means] mechanism comprises a knob located at the end of an axle of square cross-section and said resilient spring bears against [the] said flat surfaces of said axle to hold said visual reminder means in relative position unless manually moved into a new orientation.

22. (Canceled)

23. (Currently Amended)

A bracelet for indicating an event to be remembered at an hour of the day, comprising:

a series of primary links connected to form a bracelet,

wherein each primary link comprises an analog watch face design and a marker gem [stone] is provided for each hour for which an event may occur in a day and each primary link further comprising: at least one rotatable rosette having two or more different stones, such that only one stone, at any one time is viewable.

24. (Canceled)

25. (Currently Amended as to Claim number but not Claim language)

A bracelet as claimed in claim [22] 23 wherein said primary links are further provided with Roman numerals to indicate the hour for which an event may occur in a day.

26. (Original)

A bracelet as claimed in claim 23 wherein said rotatable rosette has four stones.

27. (Currently Amended)

A bracelet as claimed in claim 23 wherein each of said rosettes are held in place by a resilient spring leaf.

28. (Currently Amended)

A bracelet as claimed in claim 23 wherein said analog watch face design and marker gems [stones] are comprised of diamonds and a different colored gem.

29. (Currently Amended)

A bracelet as claimed in claim 23 wherein [the] said primary links are made from precious metal.

30. (Original)

An article of jewelry as claimed in claim 1 wherein said primary links are made from precious metal.

31. (Original)

An article of jewelry as claimed in claim 11 wherein said primary links are made from precious metal.

32. (Original)

An article of costume jewelry as claimed in claim 23.

33. (Original)

An article of costume jewelry as claimed in claim 1.

34. (Original)

An article of costume jewelry as claimed in claim 11.

The following is a clean set of the now presented claims without brackets or underlining:

1. An article of jewelry for remembering the hours for an event(s), comprising: a set of primary links each of which is provided with an hour of the day indicating means for indicating one of the sequential hours of the day, a set of connecting links, said connecting links being spaced between said primary links and together with said primary links forming a bracelet, said primary links and/or said connecting links being provided with visual reminder means for reminding the wearer of an event(s) comprising a selectively viewable mechanism associated with each of said primary and/or connecting links to indicate to the wearer which hours of the day corresponds to an event(s) to be remembered.
5. An article of jewelry as claimed in claim 1 wherein said hour of the day indicating means is selected from the group consisting of Roman numerals; Arabic numbers; an analog clock face; braille markings; and a column of stones.
6. An article of jewelry as claimed in claim 1 wherein said hour of the day indicating means comprises a second indicating means for indicating one of the sequential hours of the day associated with each of said connecting links, said second indicating means being selected from the group consisting of Roman numerals; Arabic numbers; an analog clock face; braille markings; and a column of stones.

7. An article of jewelry as claimed in claim 1 wherein said set of primary links are provided with Roman numerals and said set of connecting links are provided with an analog watch face and a hour of the day marking stone.
8. An article of jewelry as claimed in claim 1 wherein said visual reminder means comprises a knob associated with each of said primary links, said knobs comprising at least two viewable and different faces, rotatable with respect to said primary link to which it is associated and selectively displaying one of said viewable and different faces.
9. An article of jewelry as claimed in claim 8 wherein said knob comprises four faces, each face having a colored stone thereon.
10. An article of jewelry as claimed in claim 1 wherein said primary links are analog representations of a watch face and said hour of the day indicating means comprising a stone marker for the hour of the day and said visual reminder means comprises, for each primary link, a rotatable knob with at least two viewable and different faces rotatable with respect to said primary link and displaying one of said viewable faces.
11. An article of jewelry comprising a set of primary links formed into a bracelet, each primary link having a visual indication of an hour of the day for an event to be remembered; and a selectively activated reminder mechanism associated with each of said primary links comprising a rotatable knob mechanically connected to each of said

primary links, said knob having at least two visually distinct faces for selective manipulation of a face thereof into a viewable position.

12. An article of jewelry as claimed in claim 11 wherein each of said knobs has four faces, each of which is provided with a colored gem.
13. An article of jewelry as claimed in claim 11 wherein, for each of said primary links, a pair of said knobs are provided, said pair being located on the end of a rotatable axle passing through said primary links, said knobs having different visual indicators from one another.
14. An article of jewelry as claimed in claim 11 further comprising connecting links interconnected between said primary links to form said bracelet.
15. An article of jewelry as claimed in claim 14, wherein said connecting links are provided with a separate visual indicating means for indicating the hour of the day of each of said primary links to which said connecting link is secured.
16. An article of jewelry as claimed in claim 11 wherein said visual indication of an hour of the day for an event to be remembered is selected from the group consisting of Roman numerals; Arabic numbers; analog clock face; braille marking; and a column of stones.

17. An article of jewelry as claimed in claim 15 wherein said separate visual indicating means of said connecting links for indicating the hour of the day for an event to be remembered is selected from the group consisting of Roman numerals; Arabic numbers; analog clock face; braille markings; and a column of stones.
18. An article of jewelry as claimed in claim 1 further comprising a biasing mechanism comprising an axle of square cross-section and a resilient spring bearing against a flat surface of said axle for ensuring that said visual reminder means is maintained in place until manually moved into a new orientation.
19. An article of jewelry as claimed in claim 11 further comprising a mechanical biasing mechanism for ensuring that said reminder mechanism is maintained in place unless manually moved into a new orientation.
20. An article of jewelry as claimed in claim 19 wherein said biasing mechanism is a resilient spring which mechanically cooperates with said remainder means.
21. An article of jewelry as claimed in claim 19 wherein said visual reminder mechanism comprises a knob located at the end of an axle of square cross-section and said resilient spring bears against said flat surfaces of said axle to hold said visual reminder means in

relative position unless manually moved into a new orientation.

23. A bracelet for indicating an event to be remembered at an hour of the day, comprising:
a series of primary links connected to form a bracelet,
wherein each primary link comprises an analog watch face design and a marker gem is provided for each hour for which an event may occur in a day and each primary link further comprising: at least one rotatable rosette having two or more different stones, such that only one stone, at any one time is viewable.
25. A bracelet as claimed in claim 23 wherein said primary links are further provided with Roman numerals to indicate the hour for which an event may occur in a day.
26. A bracelet as claimed in claim 23 wherein said rotatable rosette has four stones.
27. A bracelet as claimed in claim 23 wherein each of said rosettes are held in place by a resilient spring leaf.
28. A bracelet as claimed in claim 23 wherein said analog watch face design and marker gems are comprised of diamonds and a different colored gem.
29. A bracelet as claimed in claim 23 wherein said primary links are made from precious metal.
